

St. Nicholas Damask Rose

Rosa x damascena 'St. Nicholas'

Height: 5 feet

Spread: 5 feet

Sunlight: ○

Hardiness Zone: 4a

Description:

A pretty old-fashioned heirloom-type shrub rose, featuring showy semi-double pink flowers with bright yellow centers in early summer on a mounded form; needs full sun and very well-drained soil

Ornamental Features

St. Nicholas Damask Rose is clothed in stunning fragrant pink flowers at the ends of the branches in early summer. The flowers are excellent for cutting. It has green deciduous foliage. The oval compound leaves turn yellow in fall.

Landscape Attributes

St. Nicholas Damask Rose is a multi-stemmed deciduous shrub with a more or less rounded form. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a high maintenance shrub that will require regular care and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. It is a good choice for attracting bees to your yard. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Disease
- Spiny

St. Nicholas Damask Rose is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- General Garden Use

Planting & Growing

St. Nicholas Damask Rose will grow to be about 5 feet tall at maturity, with a spread of 5 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front, and is suitable for planting under power lines. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.
