

Ruby Ice™ Rose

Rosa 'KORburox'

Height: 24 inches

Spread: 12 inches

Sunlight: ○ ●

Hardiness Zone: 4b

Group/Class: Floribunda Rose

Description:

A very compact Floribunda with flowers in clusters of up to 12 blooms; vivid scarlet red double flowers with silver reverses; pink and silver in higher sun areas; well suited for landscaping or containers; very good disease resistance

Ornamental Features

Ruby Ice Rose features showy double scarlet flowers with a silver reverse at the ends of the branches from late spring to mid fall. The flowers are excellent for cutting. It has dark green deciduous foliage. The glossy oval compound leaves do not develop any appreciable fall color.

Landscape Attributes

Ruby Ice Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. It is a good choice for attracting bees to your yard. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spiny

Ruby Ice Rose is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening
- General Garden Use

Planting & Growing

Ruby Ice Rose will grow to be about 24 inches tall at maturity, with a spread of 12 inches. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.
