

Sultry Night™ Rose

Rosa 'Sultry Night'

Height: 4 feet

Spread: 3 feet

Sunlight: ○

Hardiness Zone: 4b

Group/Class: Shrub Rose

Description:

A wonderful disease resistant selection providing interesting color throughout the growing season; full blooms are magenta to pink with lavender reverse; strong fragrance of citrus, old rose and tea; great for beds, borders or fresh cut arrangements

Ornamental Features

Sultry Night Rose is bathed in stunning double fuchsia flowers with pink overtones and a lavender reverse at the ends of the branches from late spring to late summer. The flowers are excellent for cutting. It has green deciduous foliage. The oval compound leaves turn yellow in fall.

Landscape Attributes

Sultry Night Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spiny

Sultry Night Rose is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening
- General Garden Use

Planting & Growing

Sultry Night Rose will grow to be about 4 feet tall at maturity, with a spread of 3 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. To help this plant achieve its best flowering performance, periodically apply a flower-boosting fertilizer from early spring through into the active growing season. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.
