

White Simplicity Rose

Rosa 'White Simplicity'

Height: 5 feet

Spread: 3 feet

Sunlight:

Hardiness Zone: 4b

Group/Class: Shrub Rose

Description:

A riveting shrub rose that is excellent for hedging; produces clusters of large semi-double white flowers with buttery centers; somewhat susceptible to pests and disease, this cultivar will benefit from regular care for best results

Ornamental Features

White Simplicity Rose is clothed in stunning lightly-scented semi-double white flowers with lemon yellow eyes at the ends of the branches from late spring to late fall. The flowers are excellent for cutting. It has dark green deciduous foliage. The oval compound leaves do not develop any appreciable fall color. The fruits are showy red hips displayed from early to late fall.

Landscape Attributes

White Simplicity Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a high maintenance shrub that will require regular care and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Disease
- Spiny

White Simplicity Rose is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- General Garden Use

Planting & Growing

White Simplicity Rose will grow to be about 5 feet tall at maturity, with a spread of 3 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front, and is suitable for planting under power lines. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid.
