

Irish Regen Rose

Rosa 'Irish Regen'

Height: 5 feet

Spread: 4 feet

Sunlight: ○

Hardiness Zone: 4b

Other Names: Irish Mist Rose, Irish Summer Rose

Group/Class: Floribunda Rose

Description:

A hardy and vigorous floribunda with very large double blooms of salmon with coral shades stippled and streaked upon the petals; foliage emerges dark red and turns to a dark glossy green adding more interest; a lovely compliment to any garden or low border

Ornamental Features

Irish Regen Rose features showy lightly-scented double salmon flowers with coral-pink streaks at the ends of the branches from mid spring to mid fall. The flowers are excellent for cutting. It has dark green deciduous foliage which emerges dark red in spring. The glossy oval compound leaves do not develop any appreciable fall color.

Landscape Attributes

Irish Regen Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. It is a good choice for attracting bees to your yard. It has no significant negative characteristics.

Irish Regen Rose is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- General Garden Use

Planting & Growing

Irish Regen Rose will grow to be about 5 feet tall at maturity, with a spread of 4 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front, and is suitable for planting under power lines. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.
