

Eugene de Beauharnais Rose
Rosa 'Eugene de Beauharnais'

Height: 4 feet

Spread: 3 feet

Sunlight:

Hardiness Zone: 6b

Group/Class: Bourbon Rose

Description:

A classic among roses, this beauty presents beautiful, fully double mauve blooms that are wonderfully fragrant; an upright sturdy shrub clothed in deep green glossy foliage that is perfect as an accent plant

Ornamental Features

Eugene de Beauharnais Rose features showy fragrant fully double purple round flowers at the ends of the branches from late spring to early fall. The flowers are excellent for cutting. It has green deciduous foliage. The glossy oval compound leaves do not develop any appreciable fall color.

Landscape Attributes

Eugene de Beauharnais Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a high maintenance shrub that will require regular care and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Disease
- Spiny

Eugene de Beauharnais Rose is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- General Garden Use

Planting & Growing

Eugene de Beauharnais Rose will grow to be about 4 feet tall at maturity, with a spread of 3 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid.
